

See more.
Do more.

1588 AIM Camera Platform

The 1588 AIM is our next generation visualization platform incorporating multiple advanced imaging modalities that enable surgeons to see and do more.

Brilliant visualization.
So advanced, it's simple.

32" 4K Surgical Display

4x the resolution of a 1080p image with 4K pixel density, offering a bright, colorful viewing experience.

SDC3 Digital Capture Device

Sterile field device control, physician specific profiles, WiFi connectivity, and Critical Device Overlay. Exporting options include: DVD, USB, iPad, and EMR/PACS network storage.

PneumoClear Insufflator

Integrated smoke evacuation, heating, and humidification features for a consistently clear image and improved patient recovery.

Clarity Image Enhancement System

Improves visualization by mitigating the impact surgical plume, fog, condensation, and murky fluid can have on the image clarity.

1588 AIM 3-Chip Camera Control Unit

Improved image clarity, advanced imaging and standardization in nine surgical specialties.

L10 AIM Light Source

Transmits white light, near-infrared, and infrared wavelengths for multiple advanced imaging capabilities.

SYNK Wireless Transmitter

Transmit video wirelessly to up to 3 monitors.

SDP1000 Printer

Specialty specific settings for authentic image reproduction.
