

SwitchPoint Infinity 3

Orchestrating the Operating Theatre

Simplified

Operating Theatre Control

Stryker's SwitchPoint Infinity 3: the central point for managing your Operating Theatre video and surgical devices.

The intuitive interface allows you to easily control your Operating Room through features like one touch routing and video multi-viewing capabilities.

The Operating Theatre Integration System

Tailored to Your Needs

- Any-to-Any Digital Video Signal Routing
- Highly Configurable and Extensible
- Designed Specifically for Use in the Operating Theatre
- Built For Future Expansion

Supported Video Standards

- S-Video
- Composite
- RGBHV
- 3G-SDI
- HD-SDI
- DVI

The SwitchPoint Infinity 3 is compatible with standard video signals and supports resolutions including 1080P and up to 1200P.

Your Control Centre in the Operating Theatre

Designed specifically for the operating room, the SwitchPoint Infinity 3 features tools that help staff perform tasks efficiently.

Surgical Checklist Integration

Engage team members during surgical time-outs by broadcasting a pre-surgical checklist to all monitor screens.

Customisable Room Presets

Save and preview frequently used room configurations to reduce turn-around time and expedite room setup.

Split Screen and Quad View

Display up to four video sources for viewing multiple modalities on a single monitor.

Centralised Suite Control

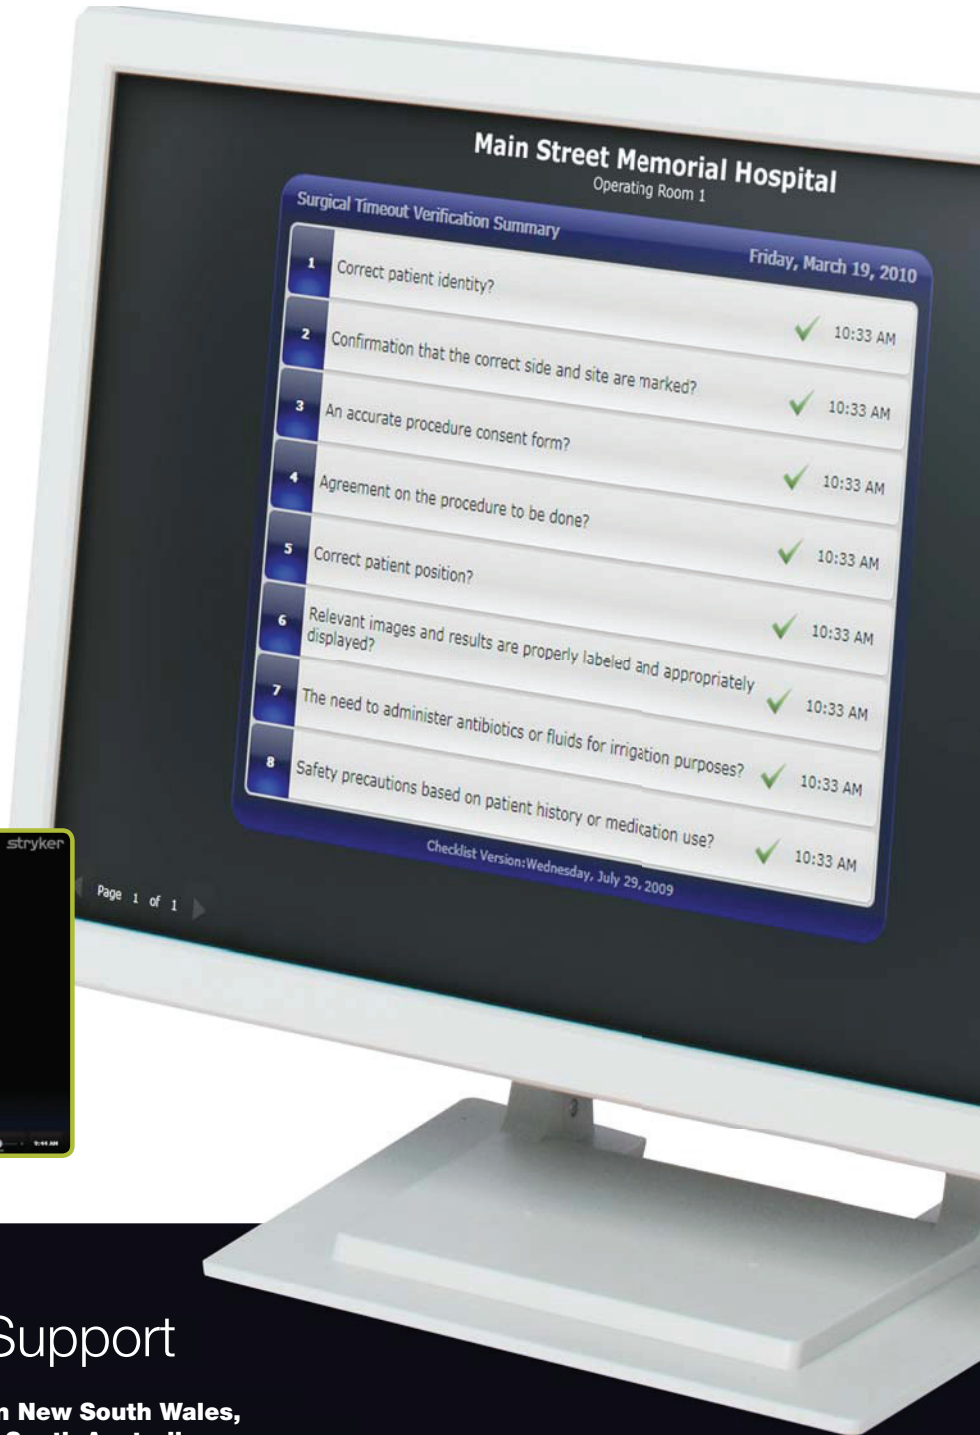

Control compatible Stryker surgical equipment from the touch panel to perform tasks and assist team members from a single location.

Control Multiple Computers

Access and control Theatre computers using a single keyboard and mouse, saving space and reducing clutter.

Teleconference from the Theatre

Bridge the distance between sites across campus or locations abroad using IP and baseband video-conferencing features.

World-Class Service and Support

Stryker South Pacific maintains offices in New South Wales, Victoria, Queensland, Western Australia, South Australia, as well as two separate locations in New Zealand. Stryker South Pacific employs field-based service technicians throughout these locations to install and service your investment when needed. This allows Stryker to maintain complete accountability of your project, from concept and installation to service and support throughout the product life-cycle.

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.
